## PLANNING FOR OTHER POST-EMPLOYMENT BENEFIT (OPEB) LIABILITIES

By Alan Carniol, Public Financial Management (PFM), Jim Link, PFM Advisors, and Jamie Whitaker, PFM Asset Management LLC

*Editor's Note: Periodically, CDIAC invites guest authors to contribute articles on topical issues of interest to the public finance community. CDIAC publishes these articles as educational resources for local governments and does not specifically endorse any of the tools or products described in them.*

### Implementation of GASB 45 Presents Tough Fiscal Challenges

With the first phase of the Governmental Accounting Standards Board (GASB) Statement 45 going into effect, planning for unfunded OPEB liabilities becomes a high priority for many public agencies. For many public entities, the accrued expense of OPEB obligations for current and future retirees creates a significant, unfunded liability in their financial statements. Public employers taking a hard look at how GASB 45 will impact their balance sheets and cash flow statements see a very sobering picture. According to the California HealthCare Foundation<sup>1</sup>, the current size of unfunded liabilities for retiree health care provided by California public employers could exceed \$200 billion.

In general, public officials are learning from actuarial reports that their annual required contributions are five to ten times the amount currently paid for retiree health care benefits on a pay as you go basis. This means that public employers are looking at total liabilities of as much as \$100,000 per retiree. If history is any indication, these costs will go even higher.

### Health Care Costs Continue to Outpace Inflation

From the year 2000 through 2005, health care premiums rose by 72 percent<sup>2</sup>, far outpacing inflation, which increased by 13 percent<sup>3</sup>. During the same period, government revenues grew by 29 percent<sup>4</sup>. Determining how your agency will manage these growing liabilities can be a daunting project, but it can be done. It begins with a complete analysis of your funding options and formulating a documented management plan based on this analysis.

### Public Employers Possess Multiple Options for Managing OPEB Liabilities

A thorough analysis of the options available for managing OPEB liabilities is necessary because there is no single, simplified solution for all public entities. In order to perform a thorough analysis, stakeholders from the various departments, including human resources, finance, audit, and treasury, must be included in the process. In addition to modifying existing plans, options for managing OPEB liabilities include the following:

1. **Creating and Funding a Trust Based on the Current Actuarial Assessment** – One of the options for funding OPEB liabilities is the creation and funding of a trust. It is important to emphasize that GASB 45 does not say that you have to create or fund a trust; however, setting up a trust can allow for investments in equities and other asset classes in an attempt to maximize total returns for the investment portfolio. The downside of setting up a trust is that contributions made to the trust are irrevocable and therefore limit the agency's ability to manage its cash flows.
2. **Issuing OPEB Obligation Bonds** – OPEB obligation bonds (OPEBOBs) are an option that should be carefully considered by public employers. While pension obligation bonds (POBs) often make sense for public employers because the growth of the benefit

## DEBT LINE IN-BOX

*“A review of events shaping the future of public debt, investment, and economic development practices in California.”*

### IRS Rules that Tribal Conduit Issuance is Private Activity Bond

The California Statewide Communities Development Authority (CSCDA) was recently informed that a 2003 conduit revenue bond issuance for the East Valley Tourist Development Authority (EVTDA), an instrument of the Cabazon Band of Mission Indians, has received a Proposed Adverse Determination Letter in conjunction with an Internal Revenue Service (IRS) examination into the tax-exempt status of the bonds. This letter was revealed in a November 27, 2006 Material Event Notice filed with FT Interactive Data, a Nationally Recognized Municipal Securities Information Repository. Specifically, the IRS concluded that “the Bonds are private activity bonds because EVTDA and the Cabazon Band of Mission Indians should not be treated as States where they have not issued their obligations for essential governmental functions.” Such a determination, if upheld, would result in the taxing of bond proceeds. The \$145.5 million bond issuance, split into two series, was used to finance a hotel, convention center, and a parking garage, as well as to refinance existing indebtedness. In the letter, the IRS goes even further by stating that “bonds issued by a State entity where an Indian tribal government is the conduit borrower are private activity bonds even if the bond proceeds are used for an essential governmental function.”

Notice of the proposed adverse determination came as the IRS is developing proposed regulations for tribal bonds. Specifically, Proposed IRS Regulation 118788-06 states that “an activity is considered an essential governmental function that is customarily performed by State and local governments if:

1. there are numerous State and local governments with general taxing power that have been conducting the activity and financing it with tax-exempt governmental bonds;
2. State and local governmental with general taxing powers have been conducting the activity and financing it with tax-exempt governmental bonds for many years; and
3. the activity is not a commercial or industrial activity.”

The proposed regulation goes on to describe some of these activities as public works projects such as roads, schools, and government buildings. These proposed regulations are available on page 45474 of Volume 71, Number 153 of the Federal Register ([www.gpoaccess.gov/fr/index.html](http://www.gpoaccess.gov/fr/index.html)).

### National Association of Securities Dealers and New York Stock Exchange to Consolidate Member Regulation Operations

On November 28, 2006, the National Association of Securities Dealers (NASD) and the New York Stock Exchange (NYSE) recently announced a the signing of a letter of intent to consolidate member regulation operations into a new self-regulatory organization that will be the single regulator for all securities brokers and dealers doing business with the public in the United

States. Such an effort is intended to eventually reduce regulatory costs to the industry by millions of dollars per year by overlapping regulation and reducing costs to the industry.

The NASD is the world’s leading private-sector provider of financial regulatory services, licensing individuals and firms, promulgating rules, and providing regulatory compliance. Currently, NASD regulates about 5,050 brokerage firms throughout the country. NYSE Regulation, a not-for-profit corporation provides regulatory oversight of exchange members and has four divisions: Market Surveillance, Member Firm Regulation, Enforcement, and Listed Company Compliance. Nearly 350 of the nation’s largest securities firms are member organizations of the NYSE. Of the NASD regulated firms, about 200 also are members of the NYSE and are thus regulated by both organizations. Upon approval by the Securities and Exchange Commission (SEC), these dual-registered firms will be ultimately subject to one set of rules and will be enforced by a single entity.

The goals of the consolidation are to make the U.S. market more competitive by streamlining regulation, making regulation more sensible and effective by creating a single regulator, ensuring industry participation in the regulatory process, adopting a uniform set of rules flexible enough to accommodate all of the firms, creating cost savings for these firms, and ensuring that the new structure is good for the capital markets and investors too. For more details, please see the NASD website set up to advertise the consolidation ([www.nasd.com/regulatoryconsolidation](http://www.nasd.com/regulatoryconsolidation)). The NASD has included general information, news releases, announcement remarks, consolidation facts, communications to firms, frequently asked questions, and a member meeting schedule.

### Legislative Analyst Releases Fiscal Outlook for California

This report, *California’s Fiscal Outlook: LAO Projections, 2006-07 through 2011-12*, provides the Legislative Analyst’s Office (LAO’s) projections of General Fund revenues and expenditures for the current fiscal year through 2011-12. Included in the report are assessments of the outlook for the state economy, demographics, revenues, and expenditures. The report assumes that spending requirements and tax provisions continue at currently legislated levels. On the budget side, the LAO projects a larger than expected reserve for the current fiscal year (\$3.1 billion) as well as larger than expected operating shortfalls for the out years (a high of \$5.5 billion in fiscal year 2007-08, falling to \$1.2 billion by 2011-12). These projections assume certain caseloads, prices, federal requirements, court orders, and other factors affecting program costs but does not take into account such factors as the Governor’s “compact” with higher education. To counter the long-term fiscal imbalance, the LAO presents various savings and revenue solutions as well as the suggestion to reduce supplemental debt repayments on the deficit-financing bonds, which would save between \$1 billion to \$1.7 billion over the next three years.

Next, the LAO projects economic and demographic developments in the State. On the economic side, the outlook is that, despite

(See **DEBT LINE In-Box** on page 3)

## CDIAC COMMISSION MEETING

On December 6, 2006, the California Debt and Investment Advisory Commission (CDIAC) met to discuss the activities of the Commission. As provided in state law, the eight-person commission includes the State Treasurer as Chair, the Governor or his designee, the State Controller or his designee, two members from the State Senate, two members from the State Assembly, and two local government representatives appointed by the Chair. The Commission's activities are carried out by an Executive Director and staff. Commission members attending the meeting included: Deputy Treasurer Laurie Weir, who chaired the Commission on behalf of State Treasurer Angelides; Vince Brown, from the Department of Finance, representing Governor Schwarzenegger; Windie Scott representing State Controller Westly; Donna Linton, Assistant County Administrator for Alameda County; José Cisneros, Treasurer for the City and County of San Francisco; and State Senator Dave Cox.

The agenda included a report by the Executive Director Jane Thompson on CDIAC's activities since June 27, 2006, the date of the last Commission meeting. These activities included the electronic submittal of debt issuance reports; plans to purchase an electronic records storage system for submittals; and completion of several seminars focusing on debt issuance and public fund investment. In addition, CDIAC completed several publications including *Investment Policy Reporting Practices: An Informational Guide*, *OPEBs and GASB 45: A Question and Answer Guide*, and *Understanding Interest Rate Swap Pricing*.

Commission members were asked to approve a resolution that would update the Executive Director's authority to enter into contracts and interagency agreements. Recently, CDIAC staff was notified that its existing resolution contained references to an obsolete State Administrative Manual (SAM) section. The updated resolution includes the correct SAM refer-

ences. Commission members approved the resolution unanimously.

Frank Moore then provided Commission members with an update on contracting activities since the last meeting. The largest of these contracts were for annual administrative services, space rental, and building security. In addition, he discussed one-time contracts that provided reimbursement to caterers and hotels for seminar-related expenses. Commission members requested that CDIAC provide them with an accounting of future seminar contracts after they take place.

Linda Louie followed this presentation with information on planned 2006 seminar activities. Upcoming collaborative programs include *The ABCs of School Debt Financing*, in conjunction with the California Association of School Business Officials (CASBO), *CDIAC at the California Society of Municipal Finance Officers (CSMFO) Annual Conference*, and a pre-conference session at *The Bond Buyer's 17th Annual California Public Finance Conference*. Some core debt and investment classes to be held during the year include: *Fundamentals of Land-secured Financing*, *Mechanics of a Bond Sale*, *Living with an Issue: On-going Bond Administration Seminar*, *Investing Public Funds: Fundamentals of Managing Your Portfolio*, and *Fundamentals of Debt Financing*.

Kristin Szakaly-Moore presented some information regarding upcoming research projects. She described several products that are currently in the process of being printed, including *Understanding Interest Rate Swaps* and *OPEBs and GASB 45: Question and Answer Guide*. In addition to these, staff is conducting an analysis of trends in local government general obligation debt issuance, updating the *Local Agency Investment Guidelines*, and working on a piece about understanding duration.

DL

### DEBT LINE In-Box

(Continued from page 2)

the recent decline in energy prices, the national and state economies will remain subdued through the end of calendar year 2007, mainly because of the ramifications of the drop in the residential real estate sector. National gross domestic product growth is projected to be 2-2.5 percent for 2007 before eventually rebounding to 3-3.5 percent by 2008. A similar projection is made for the California economy, with real estate-related activities continuing to fall, but other sectors expanding at a healthy pace, resulting in aggregate personal income and employment expanding at a subdued rate in 2007, but accelerating in 2008 and beyond. On the demographic side, the LAO predicts that the State will add 3 million people by 2012, reaching a total of 40 million by then.

Lastly, the LAO projects future revenue and expenditure growth. California General Fund budget comes primarily from three sources: personal income taxes (PIT), sales and use taxes (SUT), and corporation taxes (CT). PIT estimated payments have remained robust through 2006, but other revenue sources (corporation estimated payments, PIT withholdings, and taxable sales) have fallen throughout 2006. Overall, 2006-07 revenues are pro-

jected to increase by \$474 million as compared to the 2006-07 Budget Act. For the 2007-08 fiscal year, revenues and transfers are projected to increase 5.6 percent. In the outyears, the LAO projects that revenues and transfers will increase between 5.8 percent and 7.0 percent annually, eventually reaching \$127.7 billion by 2011-12. General Fund expenditures are projected to grow from \$102.1 billion in 2006-07 to \$105.6 billion in 2007-08, an increase of 3.4 percent. From 2006-07 through 2011-12, spending is expected to increase by an average annual rate of 4.8 percent (roughly one percentage point less than statewide personal income growth). LAO's General Fund projections over this time frame for individual program areas vary widely. For instance, at the low end of the scale, CalWORKs is only expected to grow at a 0.3 annual percentage rate, while on the other end of the spectrum, the debt service on infrastructure bonds is expected to increase by 10.8 percent annually.

For more information on the LAO projections or for any LAO publication, please see the LAO website at [www.lao.ca.gov](http://www.lao.ca.gov).

DL

## OPEB LIABILITIES

(Continued from page 1)

is fairly well known and the potential arbitrage advantage between the debt service and reinvestment rate may keep up with that growth, the same cannot be said for OPEBOBs. If unfavorable market conditions develop such that returns consistently fall below the cost of funds, the agency may find itself in a negative arbitrage situation. Also, issuing bonds “locks in” a hard liability in the form of debt service payments unlike the softer liability of accrued OPEB expenses. Still, this is an option that may be suitable as a complement to other options in your management plan for dealing with OPEB liabilities. If the decision to issue OPEBOBs for the entire liability is made, the public agency still will need to manage their OPEB liability. Since the actuarial valuation will change every two or three years, managing your OPEB liabilities will be an ongoing issue that requires continual monitoring.

- 3. Setting Up an Investment Fund for OPEB Liabilities** – Another option is setting up an investment fund for managing the assets that offset the OPEB liabilities. As many entities await a possible statewide solution, they may decide to set up an investment account to deposit funds intended for funding OPEB liabilities. The primary reason non-trust options should be considered is that an earmarked operating fund may enable a public employer to manage its cash flow and debt while still exhibiting knowledge and management of the issue. The tradeoff for this additional flexibility is that a lower discount rate will be used to value the liability and investment guidelines will likely require assets to be invested in short-term fixed income instruments. With the historically high inflation rates of health care premiums in mind, OPEB funds are ideally invested in assets similar to those used for pension funds to meet the anticipated future liabilities.

After considering the options available for managing OPEB liabilities, the next step is to perform a thorough analysis and to provide recommendations for how the entity should manage OPEB expenses going forward.

### **Conducting a Thorough Analysis is the Next Step towards Creating a Management Plan**

The issues surrounding OPEB liabilities are very complex, and this is why every public entity should take the time to perform a thorough analysis of the alternatives. It is the analysis that goes

beyond what is provided in the actuarial valuation that sets the foundation upon which a management plan can be developed for handling OPEB liabilities.

The analysis should be more than a cursory review of a debt model or investment policy. When creating the final analysis document, the project leader should provide a document that clearly defines the issues for the necessary governing body. The analysis should provide a series of models and alternatives with documented support for the recommendations and positions taken. Finally, the analysis should position the public entity to execute an integrated, thoughtful approach to handling OPEB liabilities going forward.

### **A Management Plan Provides a Roadmap for Handling OPEB Liabilities**

The management plan provides justification for your actions. A thoughtful management plan will include a documented analysis of the problem, an assessment of the alternatives for handling the problem, a review of the financial models utilized in deciding how to approach the problem, and a plan of action. Because of the size of OPEB liabilities in general, close attention will be paid to public entities in regards to how they decide to handle this issue.

### **Stakeholders Want to Know How Your Agency Plans to Fund OPEB Liabilities**

While the OPEB issue is daunting, a systematic and well-documented analysis of the alternatives enables public finance officials to make the right choices. A management plan will help answer the forthcoming questions from the media, consumer groups, constituents, and ratings agencies about how your entity plans to address OPEB liabilities going forward. In general, ratings agencies want to know that your public agency has given great consideration to planning for OPEB liabilities and how they will be handled in the future. Very few public entities are in a position to fully fund their OPEB liabilities immediately, but all public entities should know the answers to the questions about how they intend to handle these liabilities.

The challenge today is to recognize that there is no such thing as an off-the-shelf solution to this complex problem that works for all public entities.

In getting the order of duties and processes right, the public finance world must make the best decisions based on the total picture provided by a thorough analysis and a management plan for handling OPEB liabilities.

## SEMINAR HIGHLIGHTS

### ADVANCED CONCEPTS AND PRACTICES FOR INVESTING PUBLIC FUNDS

An “inverted yield curve environment” was the key message at the California Debt and Investment Advisory Commission’s (CDIAC’s) **Advanced Concepts and Practices for Investing Public Funds** seminar held November 16<sup>th</sup> and 17<sup>th</sup> at the Renaissance Long Beach Hotel. This CDIAC seminar was attended by over 70 public agency staff who were interested in the latest in investment economics and products, and analytical tools. Industry speakers from the public and private sector presented a myriad of concepts and current practices reflecting tools and techniques utilized in today’s economic environment during the day and a half course.

Economist John Shin from Lehman Brothers started the seminar with a presentation on the U.S. economy. He provided an overview of the sectors that impact gross domestic product, including an analysis of historic and current economic indicator trends. He emphasized that the economic indicators to follow in today’s market are consumer spending (consumption), housing, and corporate investment. Mr. Shin believes that the market is currently in a flat or inverted yield curve phase, which he projects will be around for a while, and that the Federal Reserve will not take measurable action to change interest rates until at least the end of 2007.

Annette Kerber and Craig Hughes of the County of San Bernardino shared the county’s cash flow and investment projection spreadsheets in a segment on cash flow management and forecasting. They presented their approach to daily management of cash and investment needs using a macro-level approach based on market conditions versus the traditional micro-level approach. Of particular interest was a “smoothing adjustment calculation” for daily liquidity projections, which applies the “law of diminishing returns” to cash flow projections. This adjustment takes into account historical weighted averages of monthly cash flows and allows for better projection accuracy without the need to track smaller inflows and outflows. In addition, they stressed a more tactical investment strategy whereby short-term portfolios are managed to target cash outflows and long-term portfolios are managed to target duration by filling recommended maturity ranges.

A panel of fixed-income industry representatives then presented the latest in investment products currently available to investment managers and tools to evaluate their risk versus return to the portfolio. Kay Chandler of Chandler Asset Management presented portfolio risk factors and how duration can be used to structure and manage a portfolio based on selected investment objectives. Henry Stern of the City of Los Angeles discussed techniques for investment portfolio structuring with suggestions for determining and evaluating both the single and split short- and long-term portfolios. He described some of the more commonly used short-term investment instruments such as

commercial paper, money market funds, repurchase agreements, and the Local Agency Investment Fund. Margaret Kerins of RBS Greenwich Capital delved into an analysis of callable securities, along with Raymond Johnson of Bloomberg LP, who displayed Bloomberg’s option adjusted and agency option-adjusted spread screens to evaluate callable versus non-callable (or “bullet”) securities. Ms. Kerins also demonstrated why one security might be better to buy than another based on the investor’s expectations of interest rates. The inverted yield curve environment will impact the amount of additional yield that should be received in order to take on the additional risk of a callable security. Ms. Kerins provided methods for evaluating and calculating the rate of return versus price of callable versus bullet securities. Mr. Johnson followed with additional instructional details on the use of the Bloomberg screens for this purpose.

Craig Underwood of Bond Logistix, LLC provided an overview on investing bond proceeds with an emphasis on the longer-term nature of bond proceeds, investment objectives and options, and arbitrage rebate requirements. He made recommendations on investment products given current market conditions for each of the types of bond proceed funds. He added that in order to maximize returns on reserve or construction funds, it is better to owe arbitrage rebate. He also noted that the Internal Revenue Service is starting to get tougher on enforcement of arbitrage rebating and thus it is important to develop and retain detailed calculation documentation in the event of an audit.

William Blackwill of Citigroup Corporate and Investment Banking provided insight into the role of the broker/dealer when conducting investment transactions. He suggested ways that public agencies can ensure that their interests are being served when establishing a broker/dealer relationship, including how to determine the need for and number of broker/dealers, use of a broker/dealer questionnaire, and what services to expect from the broker/dealer. He emphasized that communication with the broker/dealer is of primary importance. He suggested asking questions if terminology being used is not understood when making an investment order. He provided anecdotal evidence of how a small failure in communication resulted in a large loss when the transaction should have been a profitable investment.

Deanne Woodring of Davidson Fixed-Income Management Inc. presented a session on the use of benchmarks to improve investment portfolio management. She discussed how to use benchmarks to control risk exposure, benchmark sources, benchmark strategies and objectives, and monitoring and rebalancing the portfolio to benchmark levels. She prefaced her presentation by reinforcing the concept that today’s investment practices are more sophisticated because of the current political and internal environment. She also discussed risk factors agencies need to consider while striving for safety, liquidity, and a market rate of return.

(See Seminar Highlights on page 10)

## CDIAC HOSTS SESSION AT THE 2007 CSMFO ANNUAL CONFERENCE

### UNDERSTANDING SWAP PRICING AND RISK CALCULATIONS

As California's local agencies are becoming involved in the interest rate swap market, it is important that issuers know the basics of buying and pricing swaps to better understand initial, mark-to-market, and termination costs associated with their swap programs. The **California Society of Municipal Finance Officers (CSMFO)** has asked the **California Debt and Investment Advisory Commission (CDIAC)** to offer a session at the 2007 Annual CSMFO Conference entitled, *Understanding Swap Pricing and Risk Calculations*. This session will provide an overview of swap math and related pricing conventions, which will increase an agency's knowledge of potential swap risks. This session will cover:

- Information on the interest rate swap market
- Swap dealer pricing and sales conventions
- Indices needed to determine pricing
- Formulas for and examples of swap pricing
- Review of variables that have an effect on market and termination pricing of an existing swap

Mark your calendars and join CDIAC at the conference on Wednesday, March 7, 2007 from 3:45 – 5:00 pm. The CSMFO conference will be held at the Modesto Doubletree Hotel and Centre Plaza Convention Center. Visit [www.treasurer.ca.gov/cdiac](http://www.treasurer.ca.gov/cdiac) for a session agenda, and visit [www.events.csmfo.org](http://www.events.csmfo.org) for conference registration information.

## **SEMINAR ANNOUNCEMENT**

### **MECHANICS OF A BOND SALE**

**Anticipating an upcoming bond sale? Seeking a better understanding of what is involved in the debt issuance process? Sharpening your skills and knowledge of public finance? Need continuing education units?**

Then, join the California Debt and Investment Advisory Commission (CDIAC) on March 22-23, 2007 at the Hilton San Diego Mission Valley Hotel for its seminar, ***Mechanics of a Bond Sale***. This is one and one-half day seminar, the second in a series of three CDIAC debt management courses, is designed to provide local public officials and their staff with in-depth coverage of debt issuance and debt management processes.

The seminar covers a broad range of topics related to the bond issuance process. The program includes a discussion of debt management policies and the criticality of capital funding when planning for adequate debt. Following this, participants will hear about how to structure a financing once the decision to issue is made. Included in a separate session is a detailed discussion on credit enhancement and how to determine which type of credit enhancement is right for a given bond issue. Another panel discusses negotiating and preparing the legal documents. The second day of the seminar begins with a panel of professionals providing an interactive presentation on the marketing and pricing of an issue. The panel will focus on how the issuer prepares its package for rating agencies and what rating agencies are looking for in a bond sale. Also included in this comprehensive seminar are sessions on arbitrage requirements and restrictions and the

#### **MECHANICS OF A BOND SALE Seminar Topics**

Developing a Debt Management Policy  
The Plan of Finance  
Structuring the Financing  
Approaches to Credit Enhancement  
The Legal Documents  
Marketing and Pricing an Issue  
Understanding Arbitrage  
Investing Bond Proceeds

***Mechanics of a Bond Sale*** is open only to public officials and their staff. Representatives from cities, counties, special districts, schools and community colleges, redevelopment agencies, and other government agencies are encouraged to attend. The cost of the program is \$175. To register, visit CDIAC's website at [www.treasurer.ca.gov/cdiac](http://www.treasurer.ca.gov/cdiac) for a registration form or for on-line credit card registration using VISA or Master Card. A special hotel room rate of \$110 is available to participants on a limited basis. Please contact the Hilton San Diego Mission Valley Hotel at (619) 543-9000 directly for accommodations. For more information on the seminar, please contact CDIAC at (916) 653-3269.

***Register early, as space is limited for this popular class!***

## SEMINAR HIGHLIGHTS

(Continued from page 7)

Nancy Jones of PFM Asset Management finished the seminar with a session on portfolio rebalancing. She said that rebalancing a portfolio is needed to ensure that the portfolio continues to reflect the established investment strategy and policy as market conditions and cash flow needs may change over time. Ms. Jones recommended investment decision techniques that are designed to address various portfolio balancing needs. Echoing the message other presenters made, her general recommendation is to sell callable securities and purchase bullet securities during the current inverted yield curve environment.

---

CDIAC offers its **Advanced Concepts and Practices for Investing Public Funds** seminar every 18 months, rotating the seminar location between Northern and Southern California. CDIAC posts the presentation materials from its courses on its website at [www.treasurer.ca.gov/cdiac](http://www.treasurer.ca.gov/cdiac). Information regarding other educational seminars also can be found there. Please e-mail your education comments and questions to [cdiaceducation@treasurer.ca.gov](mailto:cdiaceducation@treasurer.ca.gov).

# DEBT LINE CALENDAR LEGEND

## CALENDAR AS OF DECEMBER 15, 2006

This calendar is based on information reported to the California Debt and Investment Advisory Commission on the Report of Proposed Debt Issuance and the Report of Final Sale or from sources considered reliable. Errors or omissions in the amount of a sale or financing participants will be corrected in a following issue. Cancelled issues are not listed in the calendar. The status of any issue may be obtained by calling the Commission.

- # Issue is newly reported in DEBT LINE. All other issues have been carried forward from previous calendars.
- + Issue has been republished to correct errata or list additional information. Additional or corrected items are underlined.

### TYPE OF SALE/DATE OF SALE

Comp	Competitive (The date of the bid opening)
Neg	Negotiated or private placement (The date of the signing of the bond purchase agreement)

### RATING AGENCIES

S	Standard & Poor's
M	Moody's Investors Service
F	Fitch IBCA
NR	Not rated

### CREDIT ENHANCEMENT

LOC	Letter(s) of Credit
Ins	Bond Insurance
Oth	Other third party enhancement
SIP	State Intercept

### TAX STATUS

Taxable	Interest is subject to federal and State taxation
Federally Taxable	Interest is subject to federal taxation
State Taxable	Interest is subject to State taxation
Subject to AMT	Interest on this issue is a specific preference item for the purpose of computing the federal alternative minimum tax.

### REFUNDING

Issue is partially or fully for refunding.

### PARTICIPANTS

BC	Bond Counsel
FA	Financial Advisor
UW	Underwriter
TR	Trustee
EN	Guarantor

### MATURITY TYPE(S)

Serial	Serial bonds
Term	Term bond
Comb	Serial and term bond, several term bonds or other types of structured financings

### INTEREST COST

NIC	Net Interest Cost	The Interest Cost represents either the winning competitive NIC/TIC
TIC	True Interest Cost	bid or the interest cost financing. The Net Interest Cost is calculated
Var	Rate pegged to an index	by using the total scheduled interest payments plus the underwriter's discount or minus the premium, divided by bond year dollars.
Qualified Zone Academy Bonds (QZAB) carry little or no interest costs		

## SELECTED REPORTING REQUIREMENTS

Under existing law (California Government Code Section 8855(k)), "The issuer of any proposed new debt issue of State or local government (or public benefit corporation incorporated for the purpose of acquiring student loans) shall, not later than 30 days prior to the sale of any debt issue at public or private sale, give written notice of the proposed sale to the Commission, by mail, postage prepaid."

Under California Government Code Section 8855(l), "The issuer of any new debt issue of State or local government (or public benefit corporation for the purpose of acquiring student loans) shall, not later than 45 days after the signing of the bond purchase contract in a negotiated or private financing, or after the acceptance of a bid in a competitive offering, submit a report of final sale to the commission by mail, postage prepaid, or by any other method approved by the commission. A copy of the official statement for the issue shall accompany the report of final sale. The Commission may require information to be submitted in the report of final sale that is considered appropriate."

Under California Government Code Section 53583(c)(2)(B) if a "local agency determines to sell the (refunding) bonds at private sale or on a negotiated sale basis, the local agency shall send a written statement, within two weeks after the bonds are sold, to the California Debt and Investment Advisory Commission explaining the reasons why the local agency determined to sell the bonds at private sale or on a negotiated sale basis instead of at public sale."
